Summary

Detail-oriented developer with hands-on experience in web application development, building responsive UIs and end to end solutions using modern technologies. Skilled in programming, databases, and data structures, with strong problem-solving and continuous learning mindset.

Education

Medi-Caps University, Indore

Bachelor of Technology – Computer Science & Engineering (Core); **CGPA:** 8.8

Graduating Year: 2027

Skills

Languages: Java, C, C++, HTML, CSS, JavaScript

Frameworks/Libraries: React, Node.js, Express.js

Databases: MySQL, MongoDB

Developer Tools: Git/GitHub, VS Code, Figma

Soft Skills: Problem-Solving, Teamwork, Communication, Adaptability, Critical Thinking

Professional Experience

Web Development Intern | CodeVeda – Remote

May 2025 – June 2025

- Developed full-stack web applications using the MERN stack
-

Projects

Pashu Pehchan (AI Cattle Breed Identification) | ([Project Demo Link](#))

- Developed as 3rd Year Minor Project
- Engineered an **AI image analysis pipeline** using YOLOv8 and EfficientNet, bilingual for field workers with automated image quality checks and real-time confidence scoring.
- Built a **secure MERN-stack platform** featuring JWT authentication, on-the-fly PDF generation, and an interactive analytics dashboard reducing manual reporting effort by **~80%**.

SignBridge (AI Sign Language Translator & Video Call Platform) | ([Project Repository](#))

- Enables real-time **communication between ASL users and non-signers** by streaming **live sign language subtitles** to the remote participant during peer-to-peer video calls.
- Developed a Python AI microservice using MediaPipe and Random Forest that processes 21 hand landmarks to classify ASL A–Z recognition, integrated with a MERN-stack backend via Socket.IO and WebRTC.

GyaanSetu (AI-Powered Learning Platform) | ([Project Demo Link](#))

- Transforms uploaded syllabi into **personalized study plans** and adaptive quizzes, enhancing the experience with multilingual support, gamification, and career guidance.
 - Designed a **RAG-based** tutoring system using Hugging Face embeddings and MongoDB Atlas Vector Search, and implemented an offline-first architecture using IndexedDB for automatic synchronization.
-

Hackathon Experience

- **UDBHAV'26** by Alta School of Technology at SAGE | **1st Runner up**
- **HackSprint** (GDG Mediacaps) | **1st Runner up**
- **RIFT '26** by Physics Wallah | **Semi-Final**
- **Prayatna 3.0** by Acropolis Institute of Technology and Research | **Final**
