SUMMARY

Detail-oriented Software Engineer with hands-on experience building scalable web applications, AI-powered backend systems, and end-to-end products using modern technologies. Proficient in Java, the MERN stack, databases, and data structures, with a strong interest in Agentic AI, RAG, and applied ML. Combines strong problem-solving ability and a collaborative mindset with a passion for continuous learning and shipping impactful software.

EDUCATION

Medi-Caps University, Indore

2023 – 2027

Bachelor of Technology — Computer Science & Engineering | CGPA: 8.8

TECHNICAL SKILLS

Languages: Java, C++, JavaScript, HTML, CSS

Frameworks & Technologies: React, Node.js, Express.js, FastAPI, LangGraph, REST APIs

Databases & Tools: MySQL, MongoDB, Git/GitHub, VS Code, Figma

Core Concepts: DBMS, OOP, Operating Systems, Data Structures & Algorithms

EXPERIENCE

Trainee AI/ML Engineer

May 2026 – Jul 2026

MoreYeas IT Tech Pvt Ltd — Onsite

- Independently built a FastAPI + LangGraph research-intelligence service featuring query planning, hybrid BM25 + vector retrieval, parallel web search, asynchronous scraping, and iterative delta-report regeneration with deterministic validation of LLM-generated reports.
- Contributed to a multi-agent AI orchestration platform, implementing intent classification, orchestrator-based request routing, and payload builders.

Web Development Intern

May 2025 – Jun 2025

CodeVeda — Remote

PROJECTS

Pashu Pehchan — AI Cattle Breed Identification | [Live Demo](#)

- Developed as a 3rd-year minor project; engineered an AI image-analysis pipeline using YOLOv8 and EfficientNet, bilingual for field workers, with automated image-quality checks and real-time confidence scoring.
- Built a secure MERN-stack platform with JWT authentication, on-the-fly PDF generation, and an interactive analytics dashboard that reduced manual reporting effort by ~80%.

SignBridge — AI Sign Language Translator & Video Call Platform | [GitHub](#)

- Enables real-time communication between ASL users and non-signers by streaming live sign-language subtitles to the remote participant during peer-to-peer video calls.
- Developed a Python AI microservice using MediaPipe and Random Forest to process 21 hand landmarks for A–Z ASL recognition, integrated with a MERN-stack backend via Socket.IO and WebRTC.

GyaanSetu — AI-Powered Learning Platform | [GitHub](#)

- Transforms uploaded syllabi into personalized study plans and adaptive quizzes, enhanced with multilingual support, gamification, and career guidance.
- Designed a RAG-based tutoring system using Hugging Face embeddings and MongoDB Atlas Vector Search; implemented an offline-first architecture with IndexedDB for automatic synchronization.

ACHIEVEMENTS

- UDBHAV'26 — Alta School of Technology, SAGE University — 1st Runner-up
- HackSprint — GDG Mediacaps — 1st Runner-up
